

Traka Web

Licensing model explained

traka
ASSA ABLOY

ASSA ABLOY, the global leader
in door opening solutions

“For customers and end users, recurring licence models are an effective way to pay for complicated and innovative software solutions that need constant development, security updates and maintenance.” Marc Benioff, CEO, Salesforce

Traka Web has over 1 million lines of code and is by far the most advanced management software in key and equipment/asset management. Our customers require that it is secure, scalable and certified to industry standards. In order to keep pace with these customer demands and to maintain the software requires continued and sustained investment. The Traka Web licensing model enables us to meet customer demands for software support and upgrades, at an affordable price.

The majority of vendors providing advanced software solutions have moved to a Recurring Licence Model e.g. Adobe, Microsoft, Salesforce, SAP etc. and customers appreciate the benefits to them of such a model.

Benefits of Traka Web:

- Centralised admin of users, user credentials, items.
- Centralised status visibility, searches, reporting of activity by item or by user
- Centralised management of access schedules, curfews, bookings, fault logging
- Item Booking – from anywhere with a browser & network access.
- Benefits of Software Support & Upgrades (included with period licences)

Benefits of software support and upgrades:

- Always have the latest version of Traka Web
- Support for latest versions of server software, database software, workstation OS, browsers, Internet Protocol
- All the latest security patches
- Appropriate levels of security and encryption
- Opportunity to use any new software features/functionality (there may be a charge for some advanced features, especially where the equipment configuration is changed)

Traka Web has three licence types: Lite, Pro, Pro Plus.

The Traka Web licensing model provides for scalable systems, scalable licences: licence prices depend on the number of Traka systems they cover. (see licensing guide overleaf)

If you buy more Traka key cabinets or locker systems, it's easy to add these to your existing licence

Choose your Traka Web licence

Do you have any of the following:

- 50+ systems (key cabinets & lockers) managed by Traka Web
- More than 25,000 users in Traka Web
- Real Time Update Services (RTUS)
- Random Return to Multiple Systems (RRMS)
- Any of Traka's packaged integrations (excluding MS Active Directory or Post-Box) or any other integration utilising Traka's integration engine
- Deployment across multiple servers

YES →

Traka Web Pro Plus

- Management of user details & entitlements across unlimited multiple lockers/cabinets
 - Management of items/descriptions across unlimited multiple lockers/cabinets
 - Event logging, alerts/alarms
 - Status enquiries, reports & audit trails across multiple systems
 - Supports RTUS or RRMS
 - Integration capabilities: input of user details (batch or real-time), output of alerts/alarms, item provision assurance, item return assurance.
 - Renewable. Expandable with more locker/cabinet systems.
- Available as a 1, 3 or 5-year licence including software support/upgrades

NO

Do you have between 2 and 49 systems?

NO

YES

Single system

Do you want:

- Renewable licence periods including upgrades and support, plus the opportunity to add more systems to this licence in the future.

Or

- Lifetime licence to use the software, just 1 year of updates. Non-renewable. Non-expandable to multiple systems.

YES

Traka Web Lite

- Management of user details & entitlements for a single cabinet/locker system and upto 25,000 users
- Management of items/descriptions
- Event logging, alerts/alarms
- Status enquiries, reports & audit trails
- Perpetual Licence to use the software with 1 year of support/upgrades (renewable).

Licence cannot be expanded to multiple systems.

Traka Web Professional

- Management of user details & entitlements across multiple lockers/cabinets (upto 25,000 users & 49 cabinet/locker systems)
 - Management of items/descriptions across multiple lockers/cabinets
 - Event logging, alerts/alarms
 - Status enquiries, reports & audit trails across multiple systems
 - Integration capabilities: input of user details (batch or real-time)
 - Renewable. Expandable with more locker/cabinet systems.
- Available as a 1, 3 or 5-year licence including software support/upgrades
