

# Capability Statement

**Cage code:** 544E4

**DUNS:** 01-677-0353

**TIN:** 770714751

**UEI:** NNBLPDGM7K29

**GSA contract #:** 47QTCA24D0095

## NAICS codes

- 334112
- 332510
- 511210
- 541511
- 561621

## Certifications

- ISO 9001:2015
- ISO 14001:2015
- ISO 27001:2013

## Core competencies

For over 30 years, Traka has delivered proven solutions for managing access to physical keys, vehicles, devices, and equipment for organizations across the globe. Our expertise in hardware and software design, paired with a consultative approach to solution mapping, ensures customers receive reliable systems that enhance security, accountability, and operational efficiency.

- **Product design & manufacturing** - Traka systems are the culmination of 30 years of product development, with focus on scalability, sustainability, serviceability, and ease of use.
- **Software & integrations** - Our solutions are driven by secure, on-prem administration software, with packaged integrations to major access control and security platforms.
- **Professional services & support** - Trained experts work with customers every step of the way, from the initial consultation, solution design and UAT, through onsite deployment and continued support.

Government facilities

Military installations

Law enforcement

VA hospitals

Fleet operations

## Key expertise

**Key & asset management**  
Automating the management of physical keys and assets to ensure accountability, efficiency, and visibility

**Security & access control**  
Creating a highly secure environment to protect assets, while strictly controlling and tracking access

**Process control**  
Developing enhanced workflows around the use of assets for greater operational efficiency and security

**Auditing & compliance**  
Ensuring detailed activity audits for regulatory compliance, business optimization, and personnel accountability

## Key differentiators

As a division of ASSA ABLOY, Traka delivers effective solutions to many of the world's biggest enterprise organizations. With fully owned and operated R&D and manufacturing, and a global network of certified technicians, we ensure best-in-class technology and support.

- Traka key cabinets and locker systems represent the culmination of 30 years of refinement in product design and manufacturing, with focus on scalability, sustainability, serviceability, and ease of use.
- Traka administration software is installed on premises, with fully encrypted communications, convenient browser-based access, and SSO authentication options. Regular testing to OWASP top-10 standards ensures secure operation on any network.
- Traka's professional services ensure a successful deployment and seamless onboarding, with flexible training, support, and maintenance options to meet the needs of your organization.

Traka's integration capabilities are unmatched in the industry, with several packaged integrations with major access control and security platforms to simplify personnel and permissions management.

With an integrated Traka solution, you can:

- Synchronize users and permissions from an existing personnel database
- Leverage the same credentials used for door access to access Traka systems
- Centrally monitor Traka events and alarms from an existing platform
- Use Traka item status to grant or revoke access in another system

Through the REST API architecture, the Traka Integration Engine allows connectivity from all major development environments, giving customers the opportunity to create intelligent new workflows within their existing security ecosystem.
