KEYper MXi

Lock-in control for every asset

Whether your operation requires dozens or thousands of keys, KEYper MXi delivers a proven solution to maximize security and accountability, while offering more efficient access and better visibility over your inventory.

The system allows authorized staff to quickly gain access to facility and vehicle keys, access cards, fuel cards and other sensitive assets, while maintaining an audit trail of every transaction, including who took each key, when, and why.

Improve security and efficiency with intelligent key and asset control

Protect inventory
Secure assets in 16-gauge steel cabinets and electronically track access

Control access
Define who can access each asset, when, how many, and for how long

Monitor activity
View inventory status in real time, and receive activity alerts via email/SMS

Audit everything
Run detailed reports for inventory visibility and staff accountability

KEYper MXi key cabinets

3 cabinet sizes offer flexible deployment options and easy scalability

Durable steel construction

Flexible authentication

Intuitive touchscreen

Electronic asset tracking

Immediate activity alerts

Cloud-based administration

Integrated camera for photo-verified auditing

Intuitive touchscreen interface with easy search/filter functions

Secure access via integrated fingerprint reader, PIN code, or optional card reader

Powder-coated, 16-gauge steel construction

Keyed puck lock option for added physical security after hours
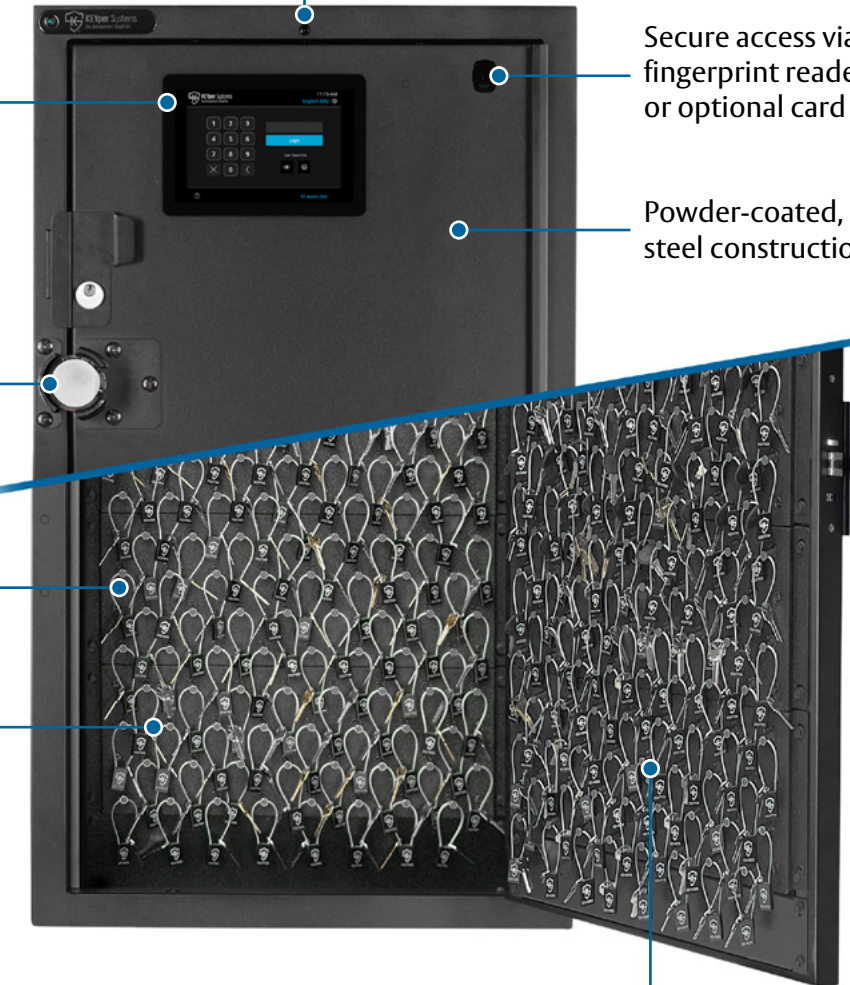

Locking panels provide per-item access control for every key and asset

Electronic verification of every key transaction

Scale cabinet capacity in 32-key increments

Control and track sensitive company assets

Facility keys, storage & restricted areas

Vehicles, machinery & heavy equipment

Fuel/credit cards & access credentials

Shared devices, tools & equipment

KEYper Smart Tag
Opt for our durable and reusable Smart Tag to enjoy a more secure and reliable method for labeling keys, each with a unique QR code for easy identification away from the cabinet.

100216

Simple operation. Effortless administration.

Our web-based software provides convenient administration of KEYper MXi systems from any authorized computer. Easily manage your key inventory, users and permissions, monitor system activity in real time, run detailed reports, and more.

- Determine who can access every item, when, and for how long
- Document the reason for item access
- Receive email/text alerts of important activity
- Monitor activity in real time, view a complete transaction history, and much more
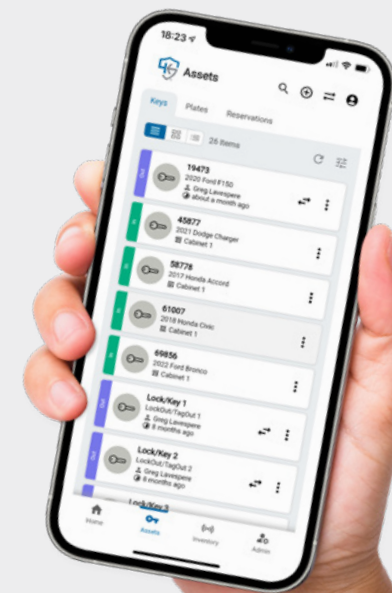

SaaS

Utilize our cloud-hosted SaaS option to enjoy MXi as a truly turnkey solution, and KEYper will host and maintain your database, perform regular backups, automatically deploy new features, and monitor your systems for any potential issues.

KEYper GO mobile app
SaaS customers also gain access to our dedicated mobile app, putting all the powerful features of KEYper MXi right in the hands of your users and administrators.

See the details and status of your key inventory from anywhere, without needing to return to the cabinet. KEYper GO helps increase visibility over important key activity, while saving valuable time in tracking down keys.

- Quickly search inventory and view current asset status
- See who currently has a key and contact them directly
- Transfer ownership of keys in the field with verified auditing
- Reserve assets at a specific date and time
- View an interactive map to see asset or vehicle location
- Scan Smart Tags attached to assets to identify unlabeled keys and view asset information

Stand or wall mounting options

Use add-on cabinets to manage over 2,000 keys on a single system

MXi Mini

Key positions: 32

Dimensions (H/W/D)
Cabinet: 15 × 27 × 12.5"
Wall mounted: 17.75 × 29 × 13"

Cabinet weight: 67 lbs

MXi Small

Key positions: 32-128

Dimensions (H/W/D)
Cabinet: 25 × 27 × 12.5"
Wall mounted: 28.25 × 29 × 13"
Stand Mounted: 64.5 × 32 × 36"

Cabinet weight: 102 lbs

MXi Large

Key positions: 32-288

Dimensions (H/W/D)
Cabinet: 49 × 27 × 12.5"
Wall Mounted: 51 × 29 × 13"
Stand Mounted: 65.5 × 32 × 36"

Cabinet weight: 181 lbs

Common specifications

Power supply: Input AC100-240V, Output DC12V
