MXi Series Lock-in Key Cabinets
Specifications

traka
ASSA ABLOY

Traka MXi electronic key cabinets provide a revolutionary method of key and asset management designed to fit the needs of the property management industry, while delivering the ultimate solution in accountability, analytics, security, and asset control. Unique to the MXi line of cabinets is its locking Fob system, which secures each key set, providing even more security for your more sensitive assets.

MXi key cabinets can be customized to fit the needs of your organization with capacities from 32 to 288 keys per cabinet, and can easily be expanded to manage more than 2,000 total keys on your local network. The cabinets can be wall mounted or configured as a free-standing system.

The intuitive MXi system provides fast and easy access for authorized users, with central monitoring and administration through our web-based software. You will always know who has your keys, when they took them, and why.

The Traka MXi system also offers a wide array of features and add-ons to meet the unique needs of your property.

MXi Standard
Secure up to 128 key sets

MXi Mini
Secure up to 32 key sets

MXi Large
Secure up to 288 key sets

Features

- Modular design allows configurations from 32 to 288 key positions in a single MXi cabinet

- Extension cabinets available to increase the capacity using a single connection

- All key positions are electromechanically locked in place, enabling strict control over the specific keys a user may access

- 10" touchscreen interface

- Enroll and edit keys through the touchscreen or web-based administration software

- Easily access cabinets using PIN code, card reader or biometric fingerprint reader

- Emergency Key Mapping functionality allows the user to easily identify keys in case of a power failure

- System provides full audit trail of users and key movements

- Integrated camera captures every check-in and check-out attempt

Intuitive touchscreen interface
